Being one of the leading Full Body Tile manufacturing company in India, we contribute to value trends and creativity with innovative and sustainable products & solutions for customers.

Limitless Sensations

When hands touch earth, soil, and air, they reactivate the deep bond that binds us to nature. Unique sensations are born, exploiting the potential of creativity through refined craftsmanship.

Combined with the fine and elegant structure of various forms, these sensations create a new material to allow the sensibility of designers to express with free and natural breath.

A material found in the many colors of the earth, a design capable of reconciling variety, knowing no limits of expression.

Feel the Essence of Colors

Casa Cloud was born from the inspiration to create a symbiosis between earth, its elements, and cloud, a primitive material of refined nature.

Natural materials that enhance each other are brought together by the craftsmanship of the designer searching for a new kind of surface.

Skilled hands caress grains of earth and perceive their intimate essence. Strengthened by this tactile knowledge, they shape delicate textures, recalling the ethereal lightness of clouds.

The result is a warm and vivid material, defined in seven colors referring to various materials and the inspiration found in them.

This material is devised to inspire professionals and welcome any application.

Empowering Colors

Casa Cloud's color palette features an evolution that delicately captures the effect of cloud formation. Its seven colors in the Clima R9 finish – Beton, Silber, Zircon, Calce, Kohle, Menta, and Toffee are inspired by various materials. Casa Cloud is an interior and cladding collection with a strong climb surface application featuring an R9 finish.

In addition, the 600x600mm and 600x1200mm formats of the collection are available in the slim and versatile thickness of 9mm.

The collection is completed with multiple Casa Art mosaic tiles, available in all colors. Casa Cloud's aesthetic identity reaches its highest expression in two different categories: Basic and Plus.

Product Specifications:

Available in size: 600x1200mm	Thickness: 9mm	Surface: Clima	Finish: R9
---	--------------------------	--------------------------	----------------------

600x1200mm

Cloud Kohle
(Coal)
600x1200mm

Cloud Zircon
(Zirconium Powder)
600x1200mm

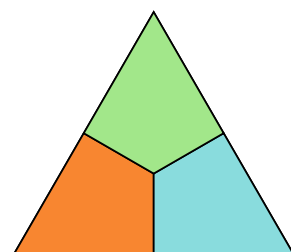

Introduction

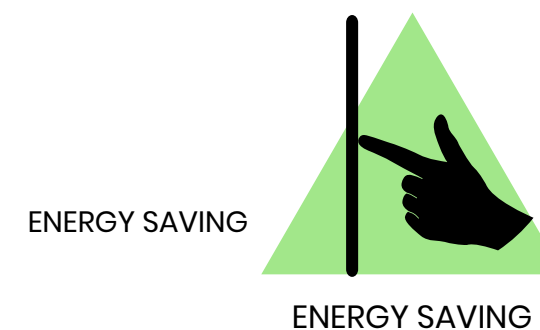

Clima is a new-generation ceramic that, thanks to special materials, is able to absorb and repel heat according to individual needs. Suitable for both indoor and outdoor applications for flooring or external walls to achieve maximum comfort with minimum energy impact.

When installed on outdoor flooring, Clima repels the heat from sunlight, resisting high temperatures. Even with significant sun exposure, the surface is not burning hot, and the floor remains cool and pleasant to walk on with bare feet.

When applied to indoor flooring, Clima retains room heat and releases it over the entire surface, producing a warmer feel than a standard floor. Ideal for surfaces that provide a wood-like effect, imparting warmth and comfort to be experienced.

On external ventilated façades, Clima helps limit heat dispersion while maintaining a steady indoor temperature. An innovative solution that helps reduce room energy demands.

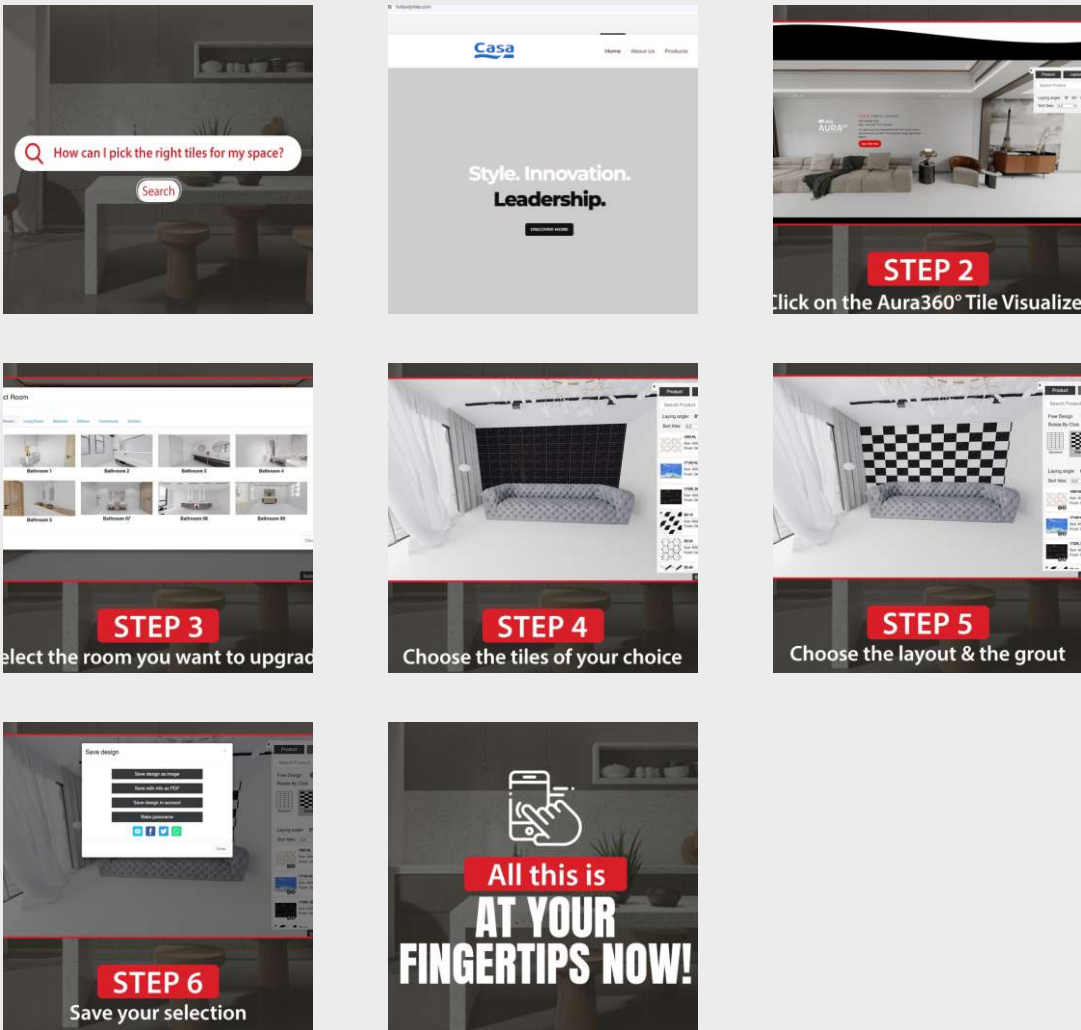

360° AR Visualizer

BRING YOUR DESIGNS TO LIFE.

Casa Fullbody Tiles allows you to set your inner designer free with our Casa AR 360° Tile Visualizer! Experience a world of tile designs at your fingertips using augmented reality.
